Professional Profile

Business Intelligence and Data Analyst with experience delivering operational reporting, dashboard development, SQL/Python automation, data validation and stakeholder-facing insights across Cisco Australia, Jung Talents, FPT Information Systems and LG Electronics. Strong at turning business requirements into governed reporting outputs, clear dashboards, documented metrics and practical recommendations for operational teams.

Career Highlights

- Automated 95% of manual billing activities across 30 Cisco accounts using AI-assisted workflows.
- Built and maintained SQL/Python reporting and validation workflows supporting recurring operational outputs.
- Delivered KPI dashboards, ad-hoc analysis and documented reporting standards for stakeholder decision-making.
- Supported ETL, data modelling, migration and quality assurance using Spark, Airflow, Neo4j, SQL and Python.
- Improved logistics reporting accuracy, inventory visibility and delivery performance through Excel and ERP analysis.

Professional Experience

Data Analyst | Nov 2024 - Present

Cisco Australia (via CH Reynolds)

- Own recurring billing and operational reporting workflows across 30 accounts, ensuring business-critical outputs are timely, reliable and easy for stakeholders to interpret.
- Leveraged AI-assisted workflows to automate 95% of manual billing activities across 30 accounts, improving consistency, cycle time and reporting visibility.
- Develop and maintain SQL and Python solutions for invoice processing, data validation, exception handling and repeatable operational reporting.
- Clean, reconcile and validate complex billing/account datasets to improve reporting accuracy, data integrity and auditability.
- Partner with operations, finance and technical stakeholders to clarify requirements, investigate issues, document logic and convert operational questions into analysis.
- Support governance through testing, quality checks, process documentation, clear assumptions and reliable handover notes.

Data Analyst | Jun 2024 - Oct 2024

Jung Talents

- Built KPI dashboards and business reports using SQL, Python and BI tools, translating requirements into usable analytical outputs.
- Delivered ad-hoc analysis to identify performance trends, operational exceptions and opportunities for improvement.
- Collaborated with stakeholders to define KPIs, refine dashboard usability and improve reporting standards.
- Documented report logic, assumptions and repeatable processes to improve team knowledge sharing.

Professional Experience - Continued

Data Analyst | Dec 2023 - May 2024

FPT Information Systems

- Developed ETL pipelines using Apache Spark and Airflow to support analytics, reporting and governed data availability.
- Led Neo4j graph database integration activities including data modelling, migration and quality checks.
- Built analytical models and structured datasets used for operational planning, forecasting and performance reporting.

Logistics Analyst | Jul 2020 - Mar 2021

LG Electronics

- Produced operational, inventory, delivery and cost reporting using ERP data, Excel dashboards and visualisations.
- Reduced delivery delays by 20% through delivery monitoring and operational follow-up.
- Improved logistics cost reporting accuracy by 30% through validation and reconciliation of cost data.
- Increased on-time delivery performance by 15% through lead-time analysis and exception visibility.
- Reduced inventory excess by 18% through stock planning, transfer support and ERP-based inventory analysis.

Education

Master of Business Analytics - Macquarie University | WAM 80/100

Bachelor of Business Administration - Hanoi University of Science and Technology | WAM 72/100

Selected Projects

- Melbourne Airbnb rental prediction model using a supervised regression pipeline; ranked 3rd of 20 in the cohort Kaggle competition.
- K-means++ customer clustering for targeted marketing and segmentation analysis.
- Prostate cancer classification using Decision Tree, Random Forest and XGBoost; achieved 80% accuracy with XGBoost.
- Tableau dashboards for Spotify, HR analytics, e-commerce and traffic accident analysis; Power BI dashboards through a PwC Switzerland job simulation.

Technical Skills

Languages: SQL, Python, R | BI: Power BI, Tableau, Excel | Data: Snowflake, MySQL, MongoDB, Neo4j

Engineering: Apache Spark, Airflow, ETL, data modelling, data validation | Practice: dashboard development, KPI reporting, reporting automation, data visualisation, data governance, Agile delivery, stakeholder communication

Certifications and Work Rights

Introduction to Data Analytics in Google Cloud | Neo4j Certified Professional | Neo4j Graph Data Science Certification

Work rights: Temporary Graduate Visa subclass 485 with unrestricted Australian work rights until 12 March 2029. Open to employer sponsorship for longer-term employment authorisation. Open to data roles across Australia or remote.
